# FUSIONE WITH 2.0L ENGINE ON 2021

THE BEST JUST GOT BETTER

### A RELIABLE ASSISTANT

### LANE-KEEPING SYSTEM

The 2021 Ford Fusion is equipped with Lane-Keeping System; an advanced system to help you stay in lane. It uses a forward-looking camera to detect if you're unintentionally drifting out of lane. It's best used in highways and it automatically deactivates at 43 mph.

A sunroof for a lighter, airier feel. The electronically operated roof glides away, allowing natural light to stream in through the roof.

### TWO PIPE EXHAUST

Because the exhaust gases exit each manifold through two pipes rather than just one, they can exit the engine faster and provide additional horsepower gains. Dual exhaust systems help reduce backpressure, which can save energy and increase the engine's efficiency for better gas mileage.

### **ACTIVE PARK ASSIST**

Active park assist is a convenient driver's aid that helps make parallel parking easy. When engaged, the system starts by helping you identify a suitable parking space.

# NEVER LOSE SIGHT OF THE WAY FORWARD

## BLIS BLIND SPOT INFORMATION SYSTEM & CROSS TRAFFIC ALERT

Cross Traffic Alert can detect oncoming vehicles and sound a warning. The technology illuminates a light in the wing mirror too: left or right. While the BLIS Blind Spot Information System is an accurate register of the vehicle's surroundings to help you change lanes more safely. That's because RADAR sensors scan the blind spots on either side of your vehicle.

### **STAY SHARP**

# DRIVER ALERT SYSTEM THE ULTIMATE MONITOR FOR YOUR COMFORT AND SAFETY

Driver Alert System constantly monitors your driving behavior and is designed to detect any changes that could be caused by fatigue. A warning icon appears in the display, suggesting you take a break. If your driving alertness further declines, the message is repeated and combined with a chime.

### **SONY** SO INTENSE

### **GET INSIDE SOPHISTICATED SOUND**

The Premium Audio System by Sony with Clear PhaseTM and Live AcousticsTM technologies is outfitted with leading-edge audio components for outstanding sound. At the core of the system are twelve perfectly placed, high-power speakers that produce crystal clear music like you'd hear at a live concert.

### DRIVE WITH A BOOST

Experience the outstanding responsiveness and dynamic performance.

The 2021 Ford Fusion comes in 240 HP, 340 NM Torque 2.0L Turbo EcoBoost engine, a real boost to your everyday driving experience.

The 2.0L Ecoboost engine made for spirited driving and exploring new trails with best -in -class and in performance.
