WE BELIEVE IN ANOTHER WAY TO DRIVE. TO FEEL THE ROAD WITHOUT TAKING A SINGLE CURVE FOR GRANTED. TO VALUE EVERY SINGLE DETAIL. FROM THE WHEEL RIMS TO THE REAR COAST TO COAST LIGHTS. WE BELIEVE IN THOSE WHO ASK IF A BUCKET SEAT IS REALLY NECESSARY. BECAUSE THE NEW CUPRA FORMENTOR IS NOT FOR THOSE WHO NEVER QUESTION. BUT FOR THOSE WHO DO, AND STILL DECIDE TO GO AHEAD.

## ANOTHER WAY TO OBSERVE

BEAUTY. YOU CAN ARGUE ABOUT IT, OR YOU CAN ENJOY IT. BECOME ANGRY WHEN OTHERS CANNOT SEE THE SAME BEAUTY THAT YOU DO, OR UNDERSTAND THAT IT IS PRECISELY THE SUBJECTIVENESS OF BEAUTY THAT MAKES IT ETERNAL. ONE PERSON, ONE BEAUTY. UNTIL THE END OF TIME. THIS OTHER BEAUTY, WITHOUT LIMITS OR RESTRICTIONS, HAS LITTLE TO DO WITH THE OBJECT BEING OBSERVED, AND EVERYTHING TO DO WITH THE EYES THAT LOOK UPON IT.

ISN'T THAT BEAUTIFUL?

A close-up photograph of a hand resting on a dark, possibly leather, surface. Below the hand is a car's front grille, featuring a prominent, three-dimensional Cupra logo in a metallic, copper-like finish. The grille has a complex, geometric pattern. To the right, a roll of brown fabric, likely a car seat or interior trim, is visible, showing a textured, woven material. The lighting is dramatic, highlighting the textures and the metallic sheen of the logo.

# ENVIRONMENTAL INFORMATION

## LIGHTS

Headlamps and rear lamps are 100% LED, reducing significantly power consumption and increasing life and effectiveness of the lights.

## RENEWABLE AND RECYCLED MATERIALS

Use of renewable materials (cotton, natural rubber and cellulose) and recycled materials (plastics) in various parts of the vehicle.

## TYRES

Low rolling resistance tyres provide a reduction of the rolling resistance coefficient.

## BRAKES

Incorporation of RBO technology (which reduces the residual brake torque between the brake pad and disc), permits an emissions reduction of up to 1g CO<sub>2</sub>/100km.

## AERODYNAMICS

Improved and enhanced vehicle aerodynamics, thanks to optimised design throughout the bodywork, wheels and cooling system.

## BODYWORK

Use of ultra-high strength steel, which together with hot stamping technology, permits a reduction in thicknesses and weight without loss of performance.

## ACOUSTICS

This version incorporate a double-seal system on the doors, which reduces noise levels and enhances comfort.

## SEATS

The use of new PUR foam formulations reduces the emission of volatile organic compounds (VOCs) in the cabin interior by up to 50%.

## MANUFACTURING PROCESS

In the period from 2010 to 2020, we have reduced the CO<sub>2</sub> emissions of every car manufactured by 45%, while also cutting energy consumption per car by 1%. Additionally, we've achieved a 28% saving in water consumption per car, and 64% reduction in waste generated per car.

Recovery of part of the heat emitted during the incineration process of paint drying ovens, for use as air conditioning, heating process baths or absorption machine is also helping to save energy.
